INTERIOR DESIGN
Trending designs inspired by nature
Your home is your sanctuary. When you surround yourself with peace and serenity in your living space, you are rewarded with a fuller, richer and more productive life. Studies have shown that homes that calm the mind and spirit result in greater job satisfaction, a happier family life, and a more dynamic social circle. But you don’t need studies to prove what you can feel intuitively. This is our guiding principle at Blooming Interior Design.

We bring nature inside. Lilac, moss, persimmon, aubergine; the natural world around us is filled with colors that have a calming effect on our minds. At Blooming Interior Design, we bring the beauty and complexity of the botanical world into all of our materials. Our custom upholstery workshop sources textiles from far afield to create color combinations and evocative patterns that bring the garden to your living room, to your dining room, or to spaces as small as a tablescape. We specialize in projects large and small, and are able to accommodate budgets of all sizes, as well.

Beauty is in the details. At Blooming Interior Design, we understand that it is not enough to simply saturate the walls with color. In nature, the smallest detail is never overlooked. When designing and building your interior space, we schedule several on-site visits to document changing light conditions that occur not only during the course of a day, but over seasons as well. We consider how color reflects within the contours of your particular architecture, and we find the finishes that reflect your unique individuality. Our shop also has partnerships with local foundries and woodworkers so that your project is always one-of-a-kind. This type of deliberate design requires a bit more time and consideration than simple off-the-shelf solutions. Our clients attest that this extra effort is worth every minute and every penny, as their home becomes an oasis they never dreamed possible.

Schedule your project with a Blooming Interior Design consultant today and watch your living space blossom.
