FAQ

FREQUENTLY ASKED QUESTIONS
BAR’S LEAKS COOLING SYSTEM WATER PUMP LUBE WITH ANTI-RUST
P/N 1311

Why should I add Water Pump Lube With Anti-Rust to my radiator?
Because antifreeze alone is not enough to keep the water pump seal & thermostat lubricated, and inhibit
the formation of rust and scale within the radiator.

Is it compatible with extended life anti-freeze?
Yes, it is compatible with all brands of antifreeze including conventional green or blue (silicate-based) and extended life red/orange or yellow (OAT/HOAT) coolant.

How much do I install?
One bottle treats a standard passenger vehicle/light truck. Over the road and heavy duty equipment –
Install one bottle for every 16 quarts of coolant.

How often do I install?
Once a year, every 15,000 miles or anytime cooling system is serviced.

Can I use in my race car?
Yes, it is a must if running only water in the cooling system, especially racing applications.

The bottle froze before I was able to use it, what can I do?
If the bottle did not break from freezing, just let the product thaw out, shake well, and use as normal.
