*KABRITA is not suitable for children with a confirmed Cow Milk Protein Allergy (CMPA).

KABRITA Goat Milk Toddler formula is designed for toddlers over 12 months of age. Our Toddler Formula meets the FDA nutritional requirements for infant formula in the United States, but has not undergone the required clinical trial to be marketed as infant formula. The trial for KABRITA infant formula is currently in progress. Like most toddler formulas, our Toddler Formula is fortified with higher levels of calcium and phosphorus than standard infant formula. All babies are unique and there are many factors that can influence the nutritional choices that are right for them. Pre-term or low birth weight babies in particular may require specialty formula. We encourage parents to consult with a healthcare professional before making a feeding change. For more information, please visit us at www.kabritaUSA.com.
