**INSTALLATION**

1. Attach elbow to arm as shown using bolt with washer and wing nut. Repeat with other side.

2. Slide attachment fixture onto elbow until it clicks onto the pin. Make sure the flap is facing forward as pictured.

3. Attach arm rest/dowel to the attachment fixture. Make sure pin has clicked into both holes securely.

4. Slide leg attachments onto bottom arm rest. Make sure pin has clicked into holes and that both legs are on the same setting so toilet safety frame will be level.

Carex Health Brands

With a screwdriver remove screws and nut holding on toilet seat.

NOTE: for most toilets you will need to reach behind and underneath toilet to unscrew the nut while using screwdriver to unscrew top screw.

Carefully lift off toilet seat and lid.

See picture for example of a typical toilet screw/nut.

Place toilet and lid on top of attachment fixture. Flip lifting up holes. Replace toilet screws and nuts. Tighten and check for stability before using.
