1. **Q: How do I set up Mi Box S to watch in 4k?**
   A: In order to display 4K, set the display mode in the Setting-Display-Display Mode to 4K. To watch 4K content, such Netflix, set the video settings to 4K@30hz and above.

   Note: You will need to have a 4K capable TV to display video and content in 4K.

2. **Q: Can I use Ethernet connections?**
   A: Mi Box S supports Wi-Fi connection out of the box, you can only use Ethernet with an USB to Ethernet adapter.

3. **Q: How to use Live Button on the remote?**
   A: One click to “Live Channel” feature

   Live Channel feature can be activated by downloading a third-party Live TV app

4. **Q: How to Setup Mi Box S**
   A: Step 1: Plug in the Mi Box S to the outlet with the provided power supply, as well as connecting the Mi Box S to an HDMI supported TV

   Step 2: The device will boot up as well as being greeted by a welcome message.

   Step 3: Follow the instructions on-screen to connect the device and remote control.

   Step 4: Select your preferred system display language and connect to your home Wi-Fi network (2.4G and 5G Supported).

   Step 5: After setup, the system will automatically download the latest Android Patch in the background, once completed, the device will automatically apply and install the latest patch.

   Step 6: Once completed, verify and insert your Google Account information to login.

   Step 7: You are now running on the latest patch! Time to enjoy your favorite content on your TV!
